

# CityGIS™

## Next Generation Enterprise GIS

CityGIS™ + CommunityView™ is a Software-as-a-Service enterprise GIS application created specifically for cities and other local government organizations. By embedding powerful GIS technology in an easy-to-use, cost-effective tool, all city staff can access, create, edit and share spatial data with ease and confidence. With CommunityView™, cities can publish community and property information to the web, saving cities time and money and enhancing residents' community awareness.

View and share spatial data across departments for improved decision making. Zoning, sewer lines, fire hydrants, and property data show above

## Powerful Enterprise GIS Technology

CityGIS™ takes the best of traditional GIS systems and delivers powerful capability in an easy-to-use and customizable tool. The ability to load, create and edit custom layers enables users to tailor the application to their unique GIS needs and makes CityGIS™ the logical integration and access point for cities' spatial data.

- load, thematically display and analyze outside spatial data sets with Data Loader & Thematic Mapper
- effortlessly edit, maintain, and publish zoning data using Zoning Editor
- manage your Master Address Database through CityGIS™
- publish city and community information to the public with CommunityView™

continued on back...

# Publish Community Information to Residents

Empower city residents to self-service many city requests by publishing select property and city information to the web using CommunityView™. Residents can quickly search for properties, zoom and pan around the map, view property details and city specific layers, and print maps. CommunityView™ is a key component of e-government initiatives.

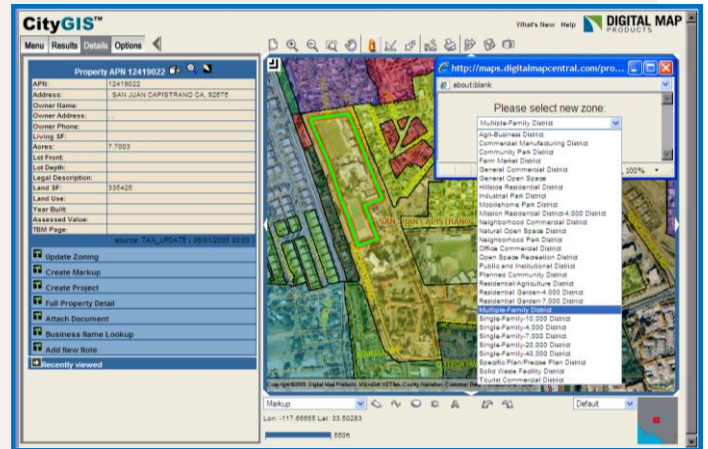

- built on the widely popular Microsoft Virtual Earth platform; familiar to users
- saves cities time and money
- easy and controlled publishing of layers directly from CityGIS™

Publish select property and city information such as: property characteristics, zoning, street sweeping schedules & historic buildings

## Easy to Use and Maintain

CityGIS™ is a cost-effective and easy-to-use alternative to traditional enterprise GIS. Because CityGIS™ is Software-as-a-Service, there are no maintenance hassles or hidden costs, and you achieve immediate efficiency gains with no added burden to IT. CityGIS™ lets users with no GIS expertise perform GIS tasks and work with spatial data with ease.

- no hardware or software to install or update; begin using right away
- easy web-based access and familiar map-based interface
- workflow features designed for city managers, planners, & community development and public works staff
- perfect complement to your existing GIS and spatial systems

Keeping Zoning Maps current is as simple as point and click

CityGIS™ + CommunityView™ is the complete solution to rapidly and cost-effectively GIS-enable your city. Experience the next generation of enterprise GIS with CityGIS™.
