BUILDING & LAND
DEVELOPMENT

PROBLEM

Acquiring the property information necessary to manage thousands of acres of land holdings was a challenge for Extell Development Company.

SOLUTION

LandVision allows Extell Development Company to easily create parcel maps and gather information that can be easily distributed across project teams.

BENEFITS

- **Access Data You Can Act On:** LandVision provides complete property information to help your team make smart, data-driven decisions.
- **Create Efficient Workflows:** Give everyone on your project team instant access to updated property data.
- **Save Valuable Time:** With all of the property data you need in one place, you can spend less time collecting and more time researching and reporting.

LandVision Helps Extell Development Manage its Mayflower Mountain Resort Assets

Alyssa Corbett, an associate at Extell Development Company, spoke to us about why LandVision was the only software her team considered for their land management needs.

Leverage LandVision for Actionable Information

Extell currently manages 5,600 acres of land for their forthcoming Mayflower Mountain Resort project in Wasatch County, Utah. The company did not initially have a software solution to manage property data for this project.

"I needed software that showed tax history and parcel information, And a real estate broker recommended LandVision," explains Corbett. "He told me it's the only solution that could help me with what I needed. I did due diligence along with our IT department, and found that LandVision really was our best option."

Streamline Project Communications

Extell typically uses LandVision to track parcel data, making it easier and faster to collaborate on the thousands of acres of land they are managing.

"Being able to outline multiple parcels, coordinate them with a number, and make them interactive is really helpful," shares Corbett. "We can make parcel maps and print them, and this is especially helpful for the less tech-savvy people on our team. We have LandVision maps hanging all over our office!"

Put Time Back in Your Development Team's Day

Corbett was the first on her team to use LandVision, and the rest of her team quickly embraced the platform because it enabled them to work faster.

"LandVision definitely saves us time," Corbett shares. "A colleague did a training, and she was mad at me for not introducing her to LandVision earlier! She had been hand-drawing parcel maps before."
